Simple Tip to Reduce Pain

Good Posture Reduces Pain

Did you know that research shows that good posture reduces pain? It also reduces wear and tear on your joints. Here's a simple yoga tip to help you maintain good posture whether sitting or standing. Bring your shoulders over your hips and your ears over your shoulders as best you can. Now bring your fingers to your collar bones. Trace your collar bones with your fingers. You will feel your shoulders move back and your shoulder blades slide down your back. This will improve your posture which will eliminate neck and back pain and promote healthier breathing. Do this several times through out your day, especially when using the computer. Have a healthy, happy 2012. Namaste.
